

Car crime within the UK is on a rapid rise.

During 2004, 1.63 million cars were broken into - one car every 19 seconds!!! Relative to this increase has been the alarming loss of laptops from vehicles. Last year 100,000 laptops were stolen which is about 270 laptops a day!!! Such high figures clearly illustrate the threat of "laptop theft". That's even without talking about the implications of losing your laptop!.....

Car crime...the hard facts

**CHURCHILL
SAFES**

The Impact

Losing a laptop actually costs a company more than expected.

They face costs of not only replacing the laptop but also a range of unaccountable costs:

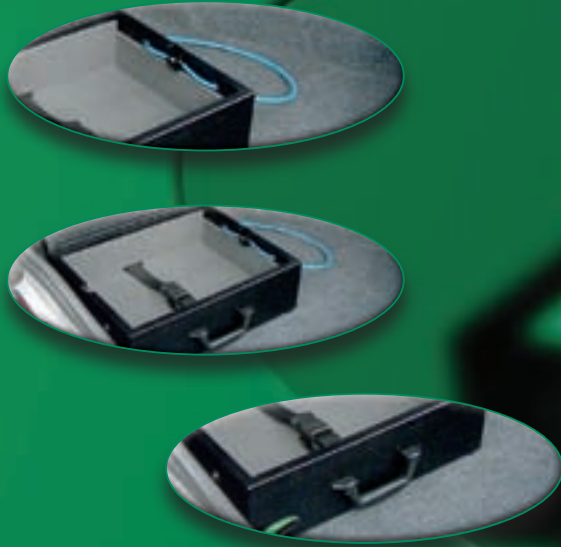

1. New laptop cost - cost of replacing the laptop. Time needed to source replacement unit
2. Software - time and cost for configuring new laptop and installing software
3. Employee work output- losing a laptop means that an employee cannot work to the same production levels prior to laptop theft
4. Business Security - laptop data could be used to facilitate more crimes against a business
5. Revenue - between laptop loss and replacement companies will hinder their capacity to develop new business

**CHURCHILL
SAFES**

Churchill safes are acknowledged as the leading manufacturer of underfloor safes and security products. They have now used their vast knowledge and expertise to design the **LapSafe**. This is an ultra secure steel safe designed to hold laptops and other small valuable items (e.g mobile phones, audio visual equipment).

Secured to the boot of any car, the **LapSafe** has the core characteristics needed for optimum security. After all "our name is your guarantee"....

Car Crime...the solution...the LapSafe

Key Features

- Mild steel construction
- Churchill revolutionary locking mechanism (patented approved)
- 2 internal adjustable straps hold the laptop tightly in place
- High grade steel security cable
- Full foam lining to protect contents whilst in transit
- Anti slip fixings to prevent movement in transit
- Smooth black paint finish
- Ergonomic folding type handle
- Easy to install - no tools needed to fit in boot of car
- External dimensions: 155mm (h) x 507mm (w) x 415mm (depth)
- Weight: 9kg
