

Atlantic RDS cash deposit – fast, secure and convenient

The Atlantic lightweight safe range is tested and certified according to the European safe norm CEN 1143-1. Adding the RDS Rotary Deposit System to the safe allows secure deposit of valuables without opening the safe.

The deposit can be made at the front of the safe or at the rear by a “through the wall” installation. Depending on the application the Atlantic RDS can always be available for deposits – or be opened for each deposit by use of a key, individual code or magnetic card.

A typical application is for internal deposits in a cash handling company and for customer deposits in small bank branches. The system is very suitable for the collection of the deposits by a CIT company.

Security

The Atlantic safe range is available in grade I, II and III according to CEN 1143-1. The French APSAD approves adding the RDS deposit system - attached to the top of the safe - in the same classes.

The safes are prepared for base fixing to the floor.

The rotating drum incorporates anti-fishing and is protected by the same barrier material as the safe.

Lock

The safe is prepared for dual locking employing the Rosengrens RKL-10 re-settable high security keylock or electronic lock.

Sizes

The Atlantic RDS has a modern design and is available in 5 sizes. The standard colour is grey RAL 7040.

The low weight of the unit means the transport and installation cost is minimised.

Deposit

The deposit head can be installed to suit front or rear access – which provides a through the wall deposit facility.

The rotating drum – easy operated by a handle at the front - provides high security as well as a fast and safe deposit procedure.

The deposit opening is designed to allow special deposits of cassettes as well as A5 and A4 deposit envelopes.

Options

- Lockable deposit compartment
- Shelves and compartments as for standard Atlantic safes
- Self closing deposit bag
- Keylock to release the deposit drum
- Solenoid to release the deposit drum
- Deposit cassettes
- Front frame for through the wall installation
- Deposit head rear facing

Self sealing transport bag

Lockable deposit compartment combined with other interior fittings

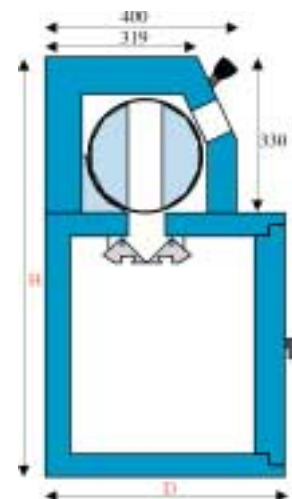

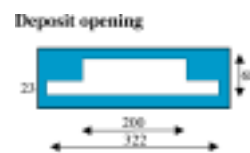

Deposit cassette C1

Lockable deposit cassettes C2

Deposit envelope A5
