

DIY

Security cabinets

Statesman

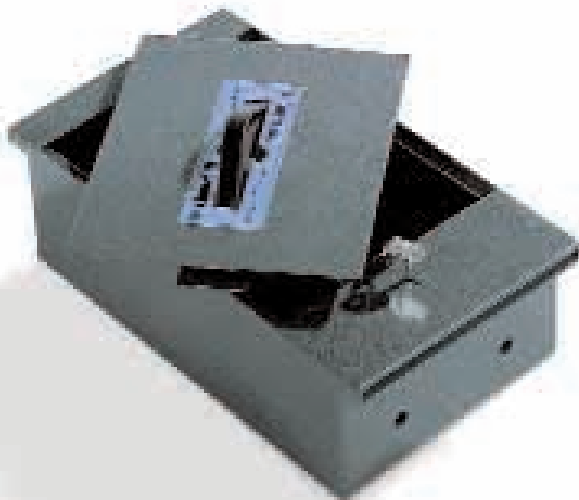

The Statesman Security Cabinet is ideal for the home or business. The strong overall plate construction gives adequate protection from physical attacks during opportunist type break-ins. Secured by a high security lock and supplied with pre-drilled holes and screws for optional base or back fixing.

Medisafe

The Medisafe Drugs Cabinet has been specifically designed to meet the current statutory regulations for the safe custody of dangerous drugs for retail pharmacies or nursing homes. It is supplied with a removable shelf as standard, secured by a high security lock. Pre drilled fixing holes and fixing screws are supplied for base or back fixing.

Floorboard chests

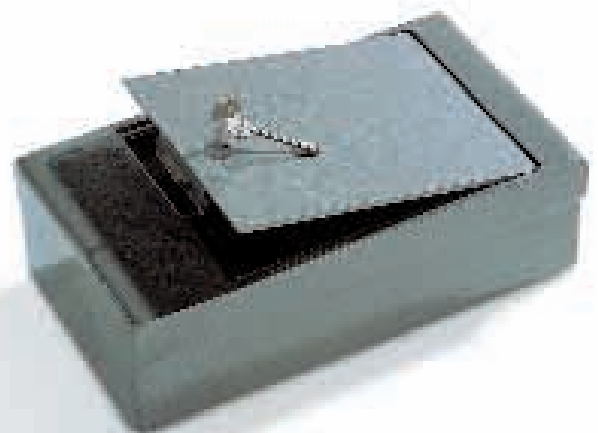

Treasure Chest Floorboard

The Treasure chest is a DIY under the floorboard unit with a lift out lid. Ideal for protecting documents and small quantities of jewellery and other valuables. Convenient and safe to use, it is suitable for installing in bedrooms and excellent for use in apartments.

MOT Daytime Security

Since the Department of Transport introduced appendix II para E to their regulations, all garage owners now need to protect their MOT books and embossing stamps in a suitable safe during daytime. Churchill have a safe designed specifically to meet this need. It has the same dimensions as the Treasure Chest, but is fitted with a hinged door. The MOT is simple to any DIY enthusiast to install. Full manufacturers instructions are provided with each safe.

Cupboard Chest

Ideal for installation in a cupboard or wardrobe the Cupboard Chest is a particularly useful strong box for storing passports and very small quantities of cash not requiring insurance cover. The well made, smoothly hinged door gives excellent access for removal of its smaller contents.

It is very important to undertake fixing in a hideaway location.

Mediasafe

The Churchill Media Safe is constructed from the best quality materials and components available today. Manufactured in the UK the Media Safe is designed to meet the ever changing needs of the commercial and domestic user. These safes come with a 1 hour fire test for diskette protection. Available in 2 sizes they offer protection that was previously unavailable from Churchill Safes.

Magpie Wall safes

The Magpie Hinged door range of wall safes provides ample protection for valuables like house deeds passports and jewellery. Fully welded construction of BRITISH steel plate and fitted with a high quality seven lever security lock.

The 6mm thick all steel body supports a 10mm door in all 5 sizes. Additional locking options are available on sizes 2, 3, 4, and 5.

The two largest sizes have shelves to maximise the use of space.
